

Dear Sir, Dear Madam,

we would like to inform you about the future procedure for assessment and verification of constancy of performances of ETICS systems.

The new version of the EAD for ETICS:

The European Organisation for Technical Assessment (EOTA) is currently developing EAD 040083-01-0404 (EAD 01), which will replace EAD 040083-00-0404 (EAD 00). Publication of EAD 01 on the EOTA website is expected in July 2025, from this date it will be possible to issue European Technical Assessments (ETA) in accordance with EAD 01. EAD 01 will be issued in accordance with Regulation (EU) No 305/2011 of the European Parliament and of the Council.

The date of publication of EAD 01 in the Official Journal of the European Union (OJEU) is not known in advance but is expected in the second half of 2025. From the date of publication of EAD 01 in the OJEU, it will no longer be possible to maintain a Certificate of Constancy of Performance (Certificate) for products with an ETA according to ETAG 004 or ETAG 004 used as EAD. And it will only be possible to issue and maintain Certificates for products with ETAs according to EAD 00 or EAD 01 only. Information on which document has been used to issue your ETA can be found on the title page of the respective ETA.

EAD 01 will bring changes in the way the assessment of characteristics is expressed, it will clarify the rules for the extended application of test results, and it will bring changes to the control plan. ETA under EAD 01 thus may, compared to ETA under previous documents, have a limited scope of assessment for some essential characteristics.

Entry into force of the new CPR:

On 7th January 2026, the EP and Council Regulation 2024/3110 (the new CPR) will enter into force. Unless EAD 01 is published in the OJEU sooner, it will no longer be possible to maintain a Certificate for products with an ETA according to ETAG 004 or ETAG 004 used as an EAD.

This regulation also limits the validity of ETAs issued under EAD 00 or EAD 01 until 2035.

Proposal for further action:

If you are interested in maintaining the validity of your Certificates for products with ETAs issued according to ETAG 004 or ETAG 004 used as an EAD, please contact the branch of the TZUS with which you cooperate and ask for a price quotation to update the relevant ETA(s) according to EAD 00. To maintain full continuity of the Certificate, these ETAs must be revised by the date of publication of EAD 01 in the OJEU, but no later than 7th January 2026.

Notified bodies will revoke the relevant Certificates no later than the above date and the holder will therefore not be able to affix the CE marking to the products.

Annex: List of concerned Certificates of Constancy of Performances and relevant ETAs.

On behalf of Technical Assessment Body:

.....
Jiří Studnička, PhD

On behalf of Product Certification Body:
